

# Wellcam International School

## MISSION

It is to build an excellent leader who transforms the world by serving the unified education with one family, church, school on biblical values. To this end, this is a Christian school that trains with solid values of spirituality, Christian personality, outstanding intellect and international competence, and leadership in service.

## VISION

To set the leader of excellent service to change the world by practicing unified education with uniting home, church, and school based on the Biblical values.

## WATCHWORD

Wellcam International School is an educational community which is leading outstanding next generations.

## Education Philosophy

### 1. Integrative Education

Wellcam center, which has the vision and the philosophy of Wellcam International School, will be an excellent piece of hardware for the next generation of education. In Wellcam International School, there are educational materials for the creation and cooperation, classrooms for Khmer and English classes and integrated lessons, multi-purposes hall for enhancing the historical consciousness, dream spaces for communicating with manners, library for imagination, and safe and beautiful scenery. These are the devotion and the consideration of the present generation for the next generation.

### 2. Education Environment

We pursue education that emphasizes the harmony of spirituality, personality, and intelligence as well as the connection with home, church, and school. The cause of the antagonism among generations, the mass production of the dysfunctional family, and the education crisis is the absence of the whole personality integrated education. The talented people who can influence goodness to this present generation should be the

leaders with harmony, communication, and integrated thought.

### 3. Bilingual Education for Global Leadership

Global leadership does not happen overnight. Wellcam education aims to maximize communication with people around the world through bilingual (Khmer/ English) intensive education since childhood. Immersion programs are offered in 50% of Cambodian and 50% of English in all subjects except Korean language and arts. Research has shown that, in general, more than four years of continuous immersion education, along with language acquisition, are also known to help promote science and mathematics.

### 4. Devoted Faculty

The quality of education is directly proportional to the absolute commitments and characters of teachers. The teachers in Wellcam International School are the disciples of Jesus Christ with a missionary mind.

There will be the next generation with mature personalities through the teachers who teach the next generation in love based on sacrificing themselves for the others by following the example of Christ's service, various administrative, office, and service staffs who care and support all students with Christian values.

## Core Values

### 1. Solid Spirituality
